

ROBERTSON, REEVS AND GUILDAY ELECTED

Hot Fight for City Attorney, Street Commissioner, Wet and Bond Issue

This year the city ticket was headed by Robert Robertson for City Clerk. Mr. Robertson was fortunate in having no opposition on the ticket. It is a comfortable position.

The next office to be voted for is City Attorney. Two years ago, City Attorney Morse defeated H. L. Reeves, who then had held the office for one term by a good majority and now Mr. Reeves shows he has power to "come back" by defeating Mr. Morse by 166.

Three candidates were on the ticket for street commissioner, Richard Guilday, the present street commissioner, Sam Moberg, who held the office several terms and Richard Alexander. Mr. Guilday wins out with an overwhelming majority.

In the ward offices most of the men were candidates for re-election and in the majority of cases they had no opposition.

In the fourth ward Andrew Danielson, the present incumbent defeated Prescott Calkins for Alderman. In the fifth ward, Robert L. Caldwell defeated Lynn Vaughan the present incumbent by nearly sixty. In the sixth ward the voters retained Thomas Wight for Alderman over Michael McDermott by over fifty majority.

None of the six supervisors were opposed on the ticket, so all will return to the county board to continue their work in that body.

With the hot fight on hand it is surprising that the wets carried the city by over 200.

The bond issue was lost by a small majority in the city but was carried overwhelmingly in the towns, in some cases by a unanimous vote.

The following is the table showing the vote in the various wards:

COUNTY BOARD MEETING
Meeting county board, April 17. A call has been made for a meeting of the new county board Tuesday, April 17, to organize and conduct such other business as may come before it.

ENTHUSIASTIC ROAD MEETING

The road school held at Ashland last week, set a new mark in enthusiasm and benefits. About one hundred were present, nearly all from out of Ashland.

In the absence of the mayor, City Commissioner W. G. Nohl welcomed the delegates in a short speech, which was responded to by F. E. Parker of Rhinelander. President of the State Highway Commissioners' Association.

Various road subjects were presented and discussed. Mr. Parker was the last man on the program who spoke on the benefits of a camping outfit.

DRYS GAIN TERRITORIES

In the election Tuesday, large territory was taken over by the drys and some territory formerly dry was made wet.

Madison went dry the first time in its history.

Springfield, the capital of Illinois, went dry, putting 214 saloons out of business. While Superior, which was dry went over to the wets, Duluth went over to the drys. Rice Lake remained dry, Ladysmith which was dry a year, then went over to the wets a year ago has gone dry again.

A large list of smaller towns has gone over to the drys. On the whole the drys have made large gains in the middle west.

War Declared!

The Resolution declaring that a state of war exists between the United States and Germany was passed late last night by the U. S. Senate—six voting against the resolution.

The above was passed after a bitter debate.

The house will pass the same resolution with little opposition.

CARPENTERS' SECRETARY DIES

Herman Krueger, Financial Secretary of the local Carpenter's Union No. 651, died of pneumonia at his home on Margaret street, April 1, after a short illness.

Mr. Krueger has been one of our well known local carpenters and contractors for many years. He leaves a wife and four young children living in Rhinelander to mourn his death. His mother and two brothers from Randolph, Wisconsin, and a sister and two brothers-in-law from Madison were here to attend the funeral.

The funeral was held from the Krueger home, Margaret street, at two o'clock yesterday afternoon, Rev. Defung officiating.

Mrs. Wm. Pecor and Miss Carrie Nitschke arrived home Wednesday from Antigo where they were the guests of the latter's sister, Mrs. T. Nixon.

FARM INSTITUTE TAKES PRACTICAL PROBLEMS

Feeding Dairy Cattle and Raising Hogs Are Important Topics.

Last week "was Farmers' Institute week in Oneida county. Owing to the bad condition of the roads the attendance was not quite as large as usual but those who did attend all felt many times repaid for their efforts in getting to these meetings.

Mr. Griswold, a dairyman of West Salem with 35 years' experience, and Mr. Bradley, a sheep and hog man of St. Croix county with even longer experience, were the instructors.

Mr. Griswold took up the subjects of "Feeding Dairy Cows for Profit" and "Raising the Dairy Heifer." In his feed talks he said we should first of all only feed good cows. The only way to determine which cows were good was by the use of the milk scale and Babcock test. He showed what he had done with his own herd. Starting in with a production of less than 200 lbs. of butter fat a year and gradually building up his herd until now it is past the 450 mark. He condemned the idea of letting the cows dry up in the winter and milking them only in the summer while they were on pasture. He also said that many farmers in the state were keeping too many milk cows and that if they would sell one-half of the cows and feed the others twice the amount of feed they would get larger returns with much less work. He said it is often times profitable to sell clover hay where there is an abundance on the farm and buy grain for the winter. When we do this, we are not selling the fertility of the farm for we are buying more fertility back in the grain feeds than we sell off in the hay.

As a second proposition for more profitable dairying, Mr. Griswold said that we were not careful enough in putting up our forage feeds. He said that clover hay when too ripe would get too woody and most of the leaves were lost. In this way we get less than one-half the feeding value out of this crop. The cow cannot digest enough of this coarse hay to produce enough milk to pay for her keep, thus we have a loss there. He also stated that most corn in the milk stage than there is when it has just begun to silk. There is again twice as much in the glazed stage than in the milk stage and this is the proper time to harvest the crop for the silo. Mr. Griswold states, that the silo furnishes the most economical feed that can be had on the dairy farm and he said the prime factor in growing silage up here would be to get the earliest variety of dent corn that it is possible for us to get.

Concerning the dairy calves, Mr.

Griswold said that more often there is too much milk given to the calf the first few weeks than too little. He said that between four and six pounds of milk. According to the size of the calf should be fed during the first two weeks. If the cow's milk is quite rich, it should be diluted with skim milk so that it does not test more than 4%. Grain feed is given to the calf just as soon as it will begin to eat it. A good grain mixture to feed is five parts of oats, three parts of bran, one part of oil meal and one part of ground meal. The calf should have all of this grain mixture it will eat. The best time for the calf to be born is in the fall. In this way it has developed enough in the winter so that it can be turned out in the pasture in the spring and as long as this pasture is good, little or no grain feed must be given. If the calf is born in the spring, it should be kept in the barn during the entire summer. Fattening feeds should be avoided but silage, hay and some grain should be fed in as large quantities as the calf will take. A heifer should be bred so that she will freshen between 21 and 27 months.

Mr. Bradley's talks on hogs were especially helpful. He said that more hogs should be raised at a profit here than are being raised at the present time. He condemned the idea of keeping hogs shut up in pens and feeding them expensive feeds. He said the only way we can get profits from hog raising is to have our hogs on good pasture. June grass, red clover, oats and peas, and soy beans make some very good pastures for hogs. He says that the greatest difficulty in raising hogs in the new country like this, is the lack of exercise in the brood sow and young litters. Sows ought to farrow between the 15th of April and the 15th of May. In this way the weather will be warm enough so that the sows can be let out to exercise freely before farrowing and then the little pigs will also have the chance to get the needed exercise. If the sow farrows while the weather is quite cold, the little pigs can be placed in an empty barrel thinking they are lost, they will make great efforts to get out of the barrel and thus get the needed exercise each day.

He urges that we grow the right type of hogs. The quicker maturing animal up here would be better. With the proper care of the brood sow and her litters, Mr. Bradley said that no dairy farm could afford to be without a goodly number of hogs.

The Institute this year was held at Cassian, Minocqua and Pine Lake. Next year it will be held at different points in the county.

STATE TO HELP CLEAR LAND

James Thannum, living north of Hayward, appeared before the senate finance committee at Madison, the other day to urge the passage of Senator A. H. Wilkinson's land clearing bill.

Mr. Thannum's farm was made the scene of the "stump dentist" operations in Sawyer county last year and his presence at Madison was desired in order to narrate the benefits which the land clearing demonstrations offers to the farmers. He spoke in favor of the Bayfield senator's bill which is to come to a decision this week.

MAKE SCHOOL WORK PRACTICAL

There seems to be a universal demand for a change that will connect the school training more closely with the life and the work of the people; a change that will bring the school to the home and tie together the book learning of the one and the doing of useful things of the other. Such a system would vitalize book education by putting into practical application the principle—"study what you have need of, or soon will need, and learn by doing."—Edward J. Tobin, superintendent, Cook County, Illinois.

Mrs. Willey entertained the Baptist ladies' aid at her home on Eagle street Wednesday.

DEVELOPMENT MEETING HELD

A monster meeting was held at Superior the other day, attended by representatives from the three counties bordering on Lake Superior, at which an organization was formed which will have for its object the development of the three South Shore counties.

More than 200 interested in the development of the South Shore counties were present at meeting held at Superior and when the permanent organization is formed, the work of development will begin.

There is a great territory lying along the shores of Lake Superior between Superior and the Michigan state line which as yet is but partially developed and the new organization formed will work for better railroads and more of them, better roads and better markets for the crops.

Aids will also be given to the farmers of the territory who are seeking to improve their lands and to get more land under cultivation. The organization has started out to do a big work and they will receive the encouragement of people from all of the counties in which development work will be done.

PREACHER IS MAYOR
The Reverend John Faville, the prominent Congregational preacher of Appleton, was elected mayor of that city Tuesday, defeating the business men's candidate by 229 majority. It is a case of conscience defeating the dollar. Appleton emulates Rhinelander's example in taking a preacher for mayor.

RESOLUTION

Resolution introduced by Supervisor Wm. Olson.

RESOLVED, by the county board of Supervisors of Oneida County,

that, WHEREAS, \$10,150.00 is designated by the proposed county bond issue, to be voted on at the election to be held on April 3, 1917, as the amount of said bond issue which, in the event that said issue receives a majority vote, is to be expended, together with additional appropriations now levied of \$3,434.00, in the Towns of Pelican and Enterprise, on the Enterprise road as now a part of the state and county highway system,

and, WHEREAS, it is a recognized fact that said amounts, totaling \$13,584.00, cannot complete said Enterprise road which, unquestionably, is a highway the completion of which will be a very valuable and desired improvement for the entire county.

NOW, THEREFORE, to insure the surveying, location, and all other preliminary work, the early construction of so much of said road as the above amounts will permit, the appropriation and levy of all amounts necessary to complete said construction and the actual completion of

Number Three. Petition of Carl Sternberg and Bernard Sternberg for the cancellation of tax deeds issued on the NE SE 3-36-11 on sale of 1912.

We recommend that the same be allowed for the reason that taxes were paid, and that the amount thereof, be paid to the petitioners and charged back to the town of Monico.

Number Four. Petition of Issie L. Cohen for cancellation of tax certificates, sale 1902, 1903, 1904, 1905, on lots One, Three, Eight, Fourteen, Block One, of Cohen, Bing, & Slimmer's Addition to Rhineland.

We recommend that the same be allowed for the reason that subsequent to the issuance of said certificates to Oneida county, said county quit-claimed all right and title to said lands to the assigner of said petitioner.

Number Five. Petition of the Wisconsin Conservation Commission for the cancellation of tax certificates sale 1913, 1914, NW NW 11-38-9, and sale of 1912, SE NE 10-38-9, all in the town of Sugar Camp, be allowed and said certificates cancelled for the reason that said lands were state lands and that the amounts of said certificates paid, to the owner thereof and charged back to the town of Sugar Camp.

Number Six. Petition of Guaranteed Investment Company for cancellation of tax deeds on lot 6 8-39-7 sale of 1913.

We recommend that the same be allowed and said deeds cancelled and the amount thereof paid to said petitioners and charged back to the town of Woodruff.

Number Seven. Petition of Guaranteed Investment Company for the cancellation of tax certificate No. 1533 NW NW 11-38-9 sale 1913.

We recommend that the same be allowed and amount thereof paid to the petitioners and charged back to the town of Sugar Camp.

Number Eight. Petition of Guaranteed Investment Company, for the cancellation of tax certificate No. 1625 sale of 1912 SE NE 10-38-9.

We recommend that the same be allowed and said certificate cancelled and the amount thereof paid to the petitioners and charged back to the town of Sugar Camp, for the reason that said lands were state lands.

Number Nine. Petition of Bernard Moran for execution of quit claim deed by County board on SE SW 4-35-10 for the purpose of cancelling tax deed issued on same dated sale of 1901 be granted for reason that no tax deed was ever issued thereon to the county.

Moved by Supervisor C. H. Olson seconded by Supervisor Abbey that report be accepted as read.

Motion carried, all members voting aye.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, setting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative power that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

WHAT'S THE REASON?

Many Rhinelanders People in Poor Health Without Knowing the Cause

There are scores of people who drag out a miserable existence without realizing the cause of their suffering. Day after day they are racked with headache and headache; suffer from nervousness, dizziness, weakness, languor and depression. Perhaps the kidneys have taken behind in their work of filtering the blood and that may be the root of the trouble. Look to your kidneys, assist them in their work—give them the help they need. You can use no more highly recommended remedy than Doan's Kidney Pills—endorsed by people all over the country and by your neighbors in Rhineland.

Mrs. C. L. Weston, 21 E. Anderson St., Rhineland, says: "I have found Doan's Kidney Pills to be an excellent medicine for weak kidneys and backache. I value them highly."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Weston had. Foster-McBarn Co., Prop., Buffalo, N. Y.

Sleeplessness And A Remedy

Sleeplessness may be a symptom of a serious nervous disorder, in which instance the sufferer should be under the treatment of a skillful specialist in nervous diseases. In other instances, it may be merely a sort of skittishness on the part of nerves which refuse to quiet down when it is time to go to sleep.

Many tricks have been invented and practiced to overcome the mental restlessness or to shut off the persistence of the mind's running in a channel which prevents sleep. These are practically all based on the same principle, viz., fatiguing the mind so that it becomes as anxious to rest as is a skittish colt after a long drive. Counting imaginary sheep, jumping over a fence, is a favorite stunt of this type. When the cause of sleeplessness is an overtaxed mind the counting plan, alone, will not work well as a rule.

The following plan seems to be a better one for the reason that it combines a rapid fatiguing process with a soothing one. The subject should assume as comfortable and fully relaxed position of the body as possible. He may begin his agreeable imagination part by fancying himself, perhaps, reclining on the bank of a beautiful stream. From then on, he should "jump his mind" as rapidly as possible from one pleasant recollection to another.

By concentrated effort, he can, in a single minute, bring many flash recollections of things or occurrences which have affected him agreeably. Thus there will come brief thoughts of a drama, a game, a childhood prank, an almost forgotten playmate, a book, a fishing excursion and many other dream-like memories. He must not let the mind linger on any of these at this stage but make it continue to travel from one thought to another at as near telegraphic speed as possible.

Soon, without the consciousness of the subject, there comes a time when the mind will rest upon some overwhelmingly pleasant, dreamy thought. The nervousness disappears and sleep comes the next moment. For the want of so simple a remedy as this, drug taking and bad mental habits have been formed. It is amazing how quickly and successfully the plan works, if the individual is not of the type who loves to be "afflicted."

CHICAGO HOME GARDENS

To those who have been reared on wilted, insipid vegetables—who have never learned the delightful flavor of crisp, fresh grown vegetables—there is little in gardening to warrant the necessary attention when prices are normal.

It is an entirely different matter, however, with beans at 4 to \$4.50 a bushel, as they were all last summer, especially since four such bushels and more can be grown under back yard conditions from a pint of beans, now costing twenty-five cents. It will cause the thrifty housewife to stop and think when she realizes that all the potatoes used per year by the average family of four and one-half, twenty-seven bushels, can be grown from a peck of seedlings, now costing seventy-five cents on a plot of ground twenty-six feet wide and forty feet long.

It is proposed in this department of the Chicago Tribune to take up back yard gardening along approved modern lines, with special regard to various soils and atmos-

paration to the final harvest. Conservation of space, of energy, and of expenditure, and the production of the best results—these shall be our aims.

The advantages are not merely economical. "Correct gardening lures men to the natural occupations of the home, gives women a pleasurable pride in the completeness of the household—stimulates in the child a love of creation and natural simplicity. It exercises a wholesome and refining influence over the character of the entire family circle."

GREATEST OF FOLLIES

In at least one city the moving picture houses refuse to use the films of any maker who sells to any school in that city. If anything will help to put moving pictures under the ban of the law it will be such folly as that. It is bad enough to make a raid on all nickels, and dimes with no greater return of good and so great liability to evil without trying to force the lovers of the movies to patronize the pro-

You Can Make Excellent Cake with Fewer Eggs

Just use an additional quantity of Royal Baking Powder, about a teaspoon, in place of each egg omitted.

This applies equally well to nearly all baked foods. Try the following recipe according to the new way:

CREAM LAYER CAKE

Old Way	New Way
1 cup sugar	1 cup sugar
1/2 cup milk	1 cup milk
1 cup flour	1 cup flour
2 teaspoons Royal Baking Powder	4 teaspoons Royal Baking Powder
3 eggs	1 egg
1/2 cup shortening	1 tablespoon shortening
1 teaspoon flavoring	1 teaspoon flavoring

Makes 1 Large 2-Layer Cake

DIRECTIONS—Cream the sugar and shortening together, then mix in the egg. After adding the flour and Royal Baking Powder together two or three times, add it all to the mixture. Gradually add the milk and beat with spoon until you have smooth pour batter. Add the flavoring. Pour into greased layer cake tin and bake in a moderately hot oven for twenty minutes. This cake is best baked in two layers. Put together with cream filling and spread with white icing.

pherie conditions of Chicago and vicinity.

It is intended to guide the prospective gardener, beginner or experienced, in establishing and caring for such garden as the space limitations permit, between rubbish heaps of the tenement districts, in the courts of apartment buildings, on unused portions of the building lot, on vacant lots adjoining or on the spacious grounds of a suburban home.

In simple language, stripped of all technical verbiage and of scientific nomenclature, the work of the week (if not of the very day) will be clearly and fully laid out to conform with the varying soil requirements and climatic changes of this vicinity. While a certain uniformity of plan and method will simplify the project, still that plan and method will be so flexible that it will readily adapt itself to most conditions confronting the householder.

THE NEW NORTH

The New North Printing Co.
Entered at the Postoffice at Rhinelander, Wis., as Second Class Mail Matter
APRIL 5, 1917.

"For the cause that lacks assistance;
For the wrong that needs resistance;
For the future in the distance
And the good that we can do."

WANTED—Boy to learn printers' trade at New North office.

Patriotism is growing so warm that it will soon be possible to find a large number of people who know more than the first six or eight lines of The Star Spangled Banner.—Exchange.

If certain men in a community would spend as much effort and time in trying to push things ahead for the public welfare as they do in finding fault and continually yelping at others who are progressive, the town would be better off. If these same men would occasionally advance an idea or two for bettering conditions over which they have a say instead of picking pinholes in what their co-workers are doing, there would be more co-operation and more results. It's the easiest thing in the world to sit back and utter complaints and objections to what somebody else is doing.—Forest Republican.

The road bond issue for \$140,000 passed in the county by a good majority in spite of the fact that its open and legitimate campaigning opponents deserted the field of open and legitimate campaigning the last hours before election and distributed blind circulars purporting to be gotten out by Taxpayers' Committee. It clearly shows that these opponents did not dare to print these misrepresentations and attacks over their own names, but wished to give a wrong impression that might draw votes. The bond issue carried in the face of all these misrepresentations.

It is understood this so-called Taxpayers' Committee consisted of one man and his two or three underlings. It really traces down to the same men that opposed the new court house several years ago. In fact, it originates with the men who have fought all the city and county improvements in the past. However, Oneida county is to have a system of good roads.

THE RUSSIAN OVERTURN
Never in human history did a great revolution achieve its ends in so short a time and with so little shedding of blood as that which has taken place in Russia. In a single week the country was transformed from an iron-bound monarchy to a socialistic republic, promising free institutions, universal suffrage and the protection of popular rights. The Romanoffs have made a permanent exit from the throne, and if the Grand Duke Michael, as is possible, should be placed at the head of the state, it will not be as the heir to the throne, a prerogative which he has formally renounced, but as the free choice of the popular assembly. Just what form of government may finally emerge it would be idle to predict, but there seems to be no formidable opposition anywhere to the new order of things. The army and its leaders are loyal to the provisional government, and there is no indication of any lessening of purpose to carry the war through to a victorious conclusion.

GOES TO FLORIDA

Zeon Stroppe of this city left Milwaukee Saturday afternoon for Pensacola, Florida, where he becomes an aviator. He was the only one of sixteen who took the examination and passed.

His examination was on mechanics aside from his physical test. As Zeon is only twenty years old a special permit had to be granted.

The father, Frank Stroppe, spent a couple days in Milwaukee before the son left for the south.

A GREATER RHINELANDER

(Contributed)

We are writing on election day. What we write will not be read until after election, and therefore, will have no influence on the result. But we will be in a position to deliberate on some things without any reference as to how we shall vote. We see in the prospect before us a greater Rhinelander—greater in population, greater as to industries, and greater as to material accomplishments. But this is not all. We see likewise in this prospect a greater public opinion forming a public opinion that is finding itself. It will soon know its power and effectiveness, and as these elements are discovered it will develop. We see a marked solidifying of forces that stand for conservation of human powers. As this work of unifying goes on it is bound to become more and more dominant in community affairs and community development. We do not know, at this writing, how the "wet" and "dry" issue will be decided. But we do know that what we call community consciousness is on the road to development. This community consciousness is finally going to determine the trend of city affairs and bring about a greater Rhinelander. We are ultimately bound to ask, not "What is going to be profitable in dollars and cents?" but "What is going to conserve human welfare and human powers?" In other words, common sense and scientific principles are to become the hand-maidens of lofty sentiment and high ideals. Justice, rightness, and wholesomeness will characterize the policy that shall prevail in our community. The greater Rhinelander will be a Rhinelander of greater spirit and greater soul. It will not be afraid to do things, and do them as they ought to be done. It will not ask first the cost of things but the worth of things. It will not wait to befall the loss of resources of infinite worth but will set about to forestall any such loss. It will call a spade a spade, and not blush for having spoken the truth. The greater Rhinelander cannot be with us on the day after election—no matter which way the election goes. It can come only through development. It can come only after a long struggle and much vigilance. It can come only after sacrifice and heroic effort. The greater Rhinelander will have greater men.

CYCLE SQUADS BEING FORMED

A motorcycle squad is being formed in Gladstone. The duties of motor scouts in times of war embrace dispatch carrying, scouting and patrol work. The local men will be part of a wide spread organization that will offer its services to the government in the event of war.

In practically every community in the United States enlistments are now being asked for and secure for a reserve army, the duty of such an army being that of guarding public and government property, industries, etc. This army is daily growing in numbers and many of the units which have been formed for some time, have offered their service to the government in the event of war.

It is admitted that in the event of war, we would have much to fear in the way of destruction of property, by foreigners within our own country and it is for the purpose of guarding against such action that these home guard companies are being formed.

BAND GIVES FIRST CONCERT

The Rhinelander City Band under the direction of its efficient leader, E. K. Riek, will give its first public concert in the high school auditorium, Friday evening, April 20th. The band is anxious to increase its equipment of music and other necessities, and will therefore make a small charge of fifteen and twenty cents for this concert. The sale of tickets will be in the hands of high school pupils, and their share of the proceeds will be used in purchasing apparatus for the high school.

The band has been practicing long and earnestly for this entertainment, and those who attend may look forward to a delightful musical evening. A variety of numbers will be offered so that friends of the band and of school may be assured of an entertainment that will be thoroughly interesting.

This is the first time that this organization, as made and charge for its entertainments, other than the help given it through the courtesy of the City Council, and it is hoped that its many loyal friends will patronize this concert extensively. Tickets will be offered for sale by members of the band and by high school students and we hope for a generous response from the people of the city.

CONGRESS MEETS CLARK SPEAKER

Congress met Monday, the house elected Champ Clark the democratic candidate for speaker by 217 as against James R. Man, republican candidate by 203.

The democrats organized the house, several independent voting with them. After the organization of the house, President Wilson read his message reiterating the deprecation of Germany against the United States, and a resolution was introduced declaring a state of war exists between these two countries. In the senate Senator LaFollette asked that the resolution be put over until Wednesday, which was done. Debates in this resolution will be made in both houses of congress. Indications are that the United States will work with the allies to destroy the German autocracy.

ENGINEERS' QUARTERS HERE

If the surrounding counties carried the road bond issue Tuesday as did Oneida county, Rhinelander will probably be the headquarters for one of the state road engineers and his assistants. There will without doubt, be eight or nine counties to be looked after in this division. If such is the case it will bring three or four families here and the offices will be at the Oneida county court house. These engineers will without doubt bring their families here during the road construction.

We will be pleased to see Oneida county the center of a division of the road construction work.

MEET IN ST. PAUL

The members of the Joint Legislative Fish and Game Committee of the state have a conference with the Minnesota senators regarding fish laws on the Mississippi in St. Paul this week.

Senator Stevens, chairman of the Wisconsin committee left this morning to be present at this meeting. Through this joint meeting it is expected similar laws will be passed to regulate fishing. The government has the regulation of game.

OPPOSE TRAINING IN SCHOOLS

The meeting of the superintendent at Kansas City, was a great gathering.

The climax of the meeting came at the close of the morning session on Friday when the report of the committee on military training in the schools was presented. It looked to the committee, appointed to prepare the report, that the cards were surely stacked against its report, as six speakers during the week, at the general meeting and at round table conferences, had strongly favored military training in the schools, one speaker going so far as to recommend its introduction down to the kindergarten. And immediately preceding the report, circulars favoring military training were distributed freely among the audience by the Universal Military Training League. The report of the committee however, was a unanimous one against combining military training with school work, and the arguments of the speakers who joined in the discussion were so convincing that the convention, in spite of the fact that the atmosphere had been charged with militaristic spirit, by an almost unanimous (standing) vote approved of the resolutions submitted. The first resolution favored universal and compulsory military training for young men from nineteen to twenty-one years of age, and the second resolution "opposed the introduction of military training and military drill, or any form of instruction which is distinctly or specifically military, into the elementary and secondary schools." The remaining resolutions gave a constructive plan of physical training and of patriotic and civic service. Many present asserted that this report was the most important and far-reaching of any presented.

RUNNING FAMILY HOTEL

Mr. and Mrs. R. D. Eppley took possession of the Hotel Waverly, at 11th street and Harmon Place in Minneapolis last Sunday morning. This hotel is a four-story, 77 room, family hotel. Twenty-seven of the suites and rooms have private bath. Many of the boarders have occupied their quarters for many years.

Mr. Eppley and his wife have had experience in running a hotel, and they should make successful and delightful hosts at this one. They will be glad to see their Rhinelander friends at any time.

OLD RESIDENT PASSES AWAY

Mrs. Nora, wife of Frank Gormley died last Saturday after an extended illness. She was nearly fifty-six years old at the time of her death. Mrs. Gormley was an old resident of Rhinelander.

The funeral was held at St. Mary's church Tuesday morning at 9:30. Before the services at the church, the Royal Neighbors of which Mrs. Gormley was a member, held appropriate exercises at the home on Dorr Avenue.

Besides the husband, five children were left to mourn the death of the mother.

GEORGE PECOR MARRIES

Mr. George Pecor, son of Mr. and Mrs. Nazarre Pecor of this city was united in marriage to Miss Lona Wunderlich, daughter of Mr. and Mrs. Chris. Wunderlich of Antigo, at the home of the bride's aunt at Appleton, March twenty-ninth. Mr. Pecor is favorably and well known in this city where he was reared.

Miss Wunderlich has visited in this city many times and is much thought of here.

The young couple is on a wedding trip in southern Wisconsin and will make their home in Antigo. New North extends congratulations.

MOVE TO COLORADO

Carl Bunch left last Monday morning for Colorado. Mr. Bunch came to Rhinelander last Nov. and has been working as a barber in the Forsythe shop and also playing with the Rhinelander City Band. He was a thorough musician as well as barber and made many friends during his stay here. His wife and three children have been in poor health since living in this northern climate and a change has been advised them.

Mr. Bunch has received the offer in his home town, of leading the band there and also conducting a barber shop.

Sugar From Wood.

Now they're making sugar out of wood. Chemists have found that they can take a ton of sawdust and get a quarter of a ton of sugar out of it. The process consists of putting the sawdust into a closed retort and subjecting it to digestion with a weak solution of sulphurous acid under a pressure of from ninety to one hundred pounds to the square inch. Eighty per cent of the sugar thus obtained is fermentable. The product is called "saccharose."

Sallent.

The word sallent means (1) standing out prominently, conspicuous; striking; as sallent features of a landscape; sallent points of an argument. (2) Thrust or bent beyond the general line; projecting, as a sallent angle. A sallent angle is a convex angle, that is, an angle considered greater than the sum of two right angles, being measured by an arc that exceeds a semi-circle.

Three of a Kind.

The loafer, the kicker and the bluffer are three of a kind, and the breed is not conducive to the welfare of any community.—Eagle Pass News-Guide.

Animals Have No Sense of Rhythm.

Animals have no sense of rhythm, though they may be taught to dance. This is the announcement of Doctor Craig of the University of Maine. "Horses driven in span," he says in the Guide to Nature, "make no attempt to step together. Two birds, however, sweetly they sing solo, never sing in time with one another nor with any other music. Even the so-called dancing animals of the circus get their rhythm from the trainer, not from the tune."

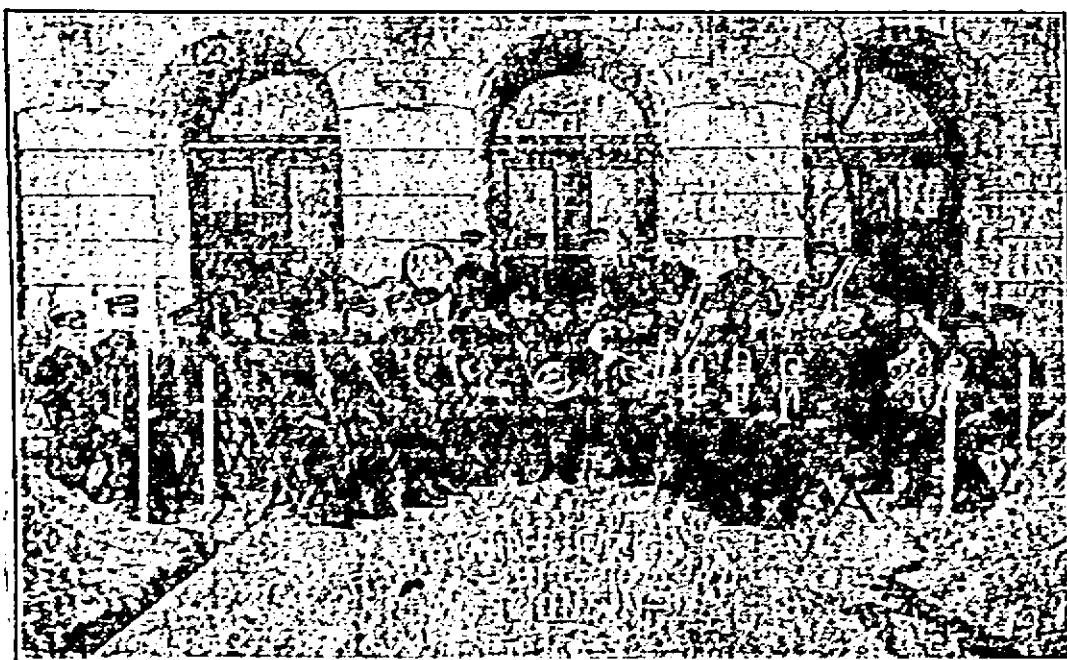

Tracing Organ Mechanism.

When pneumatic power in the construction of the organ began to take the place of the hydraulic is uncertain, although the invention of the bellows mechanism dates from the time of one of the later Roman emperors—probably Julian. But it was only in the tenth century, when Germany had taken the place of Constantinople as the center of organ building, that the bellows mechanism came into general adoption.

Safeguarder.

Here is an advertisement of an extremely mannish vest lined with peau de cygne, but even if we can't find out in time what peau de cygne is we suppose we can guard against putting on our wife's by mistake by looking for the drawstring.—Columbus (O.) Journal.

RHINELANDER CITY BAND

Rhinelander City Band, through efforts of E. K. Riek, director, has been engaged to play three days at the Wisconsin State Fair in Milwaukee in September.

The band has a membership of 33 and is holding regular weekly rehearsals preparing for a big band concert to be given in high school on Friday, April 21, when the members will make their appearance in their new uniforms.

Fair engagements will mean a great advertisement for Rhinelander.

After the Grip —What?—

Did it leave you weak, low in spirits and vitality? Influenza is a catarrhal disease, and after you recover from the acute stage much of the catarrh is left. This and your weakness invite further attacks.

The Tonic Needed is Peruna.

First, because it will assist in building up your strength, reinvigorating your digestion and quickening all functions. Second, because it aids in overcoming the catarrhal conditions, helping disperse the inflammation, giving the membranes an opportunity to perform their functions.

Thousands have answered the question after grip by the proper use of this great tonic treatment. You may profit by their experience.

Liquid or tablet form—both safe and satisfactory.

OUR NEW POSSESSIONS

Women And Donkeys Do
Work, Men
Rest

What is there in this "land without a country" that has just come under the sheltering wing of the American eagle?

What are the people like in these Danish West Indies, which, when these lines reach you, will be formally a part of the American nation, under the title "Virgin Islands of the United States?"

I came here to learn the answers to these questions for readers of The Telegram, and I find here a most amazing combination of great strategic value with little economic worth, of medieval local color with modern decorations.

I find that this group of islands contains a great land-locked basin capable of sheltering the entire United States navy, and that it looks out on the most direct route between Europe and the Panama canal.

And I find that the natives are mostly negroes of little education, who work for a meagre pittance and do without the most common necessities of life, such as they are regarded in the United States.

"Votes for Women" would bring an empty stare in this land without a country. "Work for Women" is the motto here.

"Let Georgia do it" is the order of the day.

His donkey and his wife are man's most valuable assets in these parts.

They may trudge along for miles yet it never will occur to the Virgin islander to get off the donkey and offer his wife a seat.

She may be suffering from elephantitis. That's a disease that makes the feet and legs swell to enormous proportions. It is common in the islands. But that makes no difference. Friend husband keeps the seat.

Everything, from a drinking cup to a pile of cane, is carried on the head in these islands. The people are "headstrong." A woman or a child will walk for miles and miles, erect with a load on the head that it would trouble an able-bodied American to shoulder.

They have sugar factories here, or at least they call them factories, but they are generally just clumps of shabby buildings with some barrels and a little rusty machinery.

The islands today have a master, if not a country. He is Hamilton Jackson, a negro schoolteacher, whom I have interviewed.

He has organized the negroes into a union, and in this way he has made the cane growers pay 10 to 15 cents a day for labor in the fields.

Sick benefits have been established, unions in the United States and Denmark helping with contributions.

The union now owns a second-hand ambulance which does service as an ambulance and is trying to acquire another.

Heretofore it was customary to dump a sick field worker into a planter's donkey cart, with a little straw, and drag him miles over rough roads to the hospital. Many died on the way.

Jackson is the negroes' idol. They look upon him as the Irish dockworkers regard Jim Larkin.

"Only God Almighty could have sent him," the wife of one of the poorer paid cane workers told me.

Prices went up as soon as the field workers' wages advanced, so they really are little better off than they were before.

Their chief food still is corn meal ("cuckoo"), okras and salt fish.

There has been some improvement, but compared to their fellows in the British and French islands I have visited, the blacks of St. Croix are in a pitiable condition.

CARD OF THANKS
Mrs. Herman Krueger and family wish to thank the kind neighbors and friends, and especially the members of the Carpenters' Union for their aid and comfort during the sickness and death of Mr. Krueger. She also wishes to thank them for the beautiful floral offerings.

FACTORY AT GREEN BAY
Enough Green Bay capital has been secured to assure this city of the proposed aeroplane factory by Alfred W. Lawson of Detroit. It is proposed to form a corporation with limited capital to make a start at manufacturing a new aircraft.

Mr. Lawson states he is in a position to secure government contracts. He says that the present output of the machines is not sufficient to supply the demand.

The Woodlot.
The farm woodlot can furnish work for men and teams during the winter months when other work is scarce. Besides aiding the farmer on the labor question, the woodlot can supply a portion of the building material, the bulk of the repair material and a large part, if not all, of the fuel used on the average farm. In addition, the well-kept woodlot may be made a source of outside income through sales of timber, ties or fuel wood.

New Easter Waists Have Just Arrived

in cities everywhere

TO 1500 stores tomorrow in 1500 cities—prudent women will wend their way—to acquire a new Wirthmor Waist or two. And such a visit will be well worth while—for the waists are so charmingly styled—and so elegantly made—that were it not for the economies of the Wirthmor Plan—under which they are made and sold—they would have to sell at considerably higher prices.

Priced As Always At Just \$1.00

Wirthmor Waists are sold at just one good store in every city, and they are sold exclusively.

Optimistic Thought.
The surest way not to fail is to determine to succeed.

Not Very Intellectual.
Many a fellow who has more money than brains hasn't the price of a pack of cigarettes.—Cincinnati Enquirer.

Quite Likely.
Probably the reason more city men don't go back to the farms is that they can't accumulate fortunes big enough.—Cleveland Leader.

Fingernail Statistics.
It has been estimated by a scientist that in a lifetime of 70 years a man grows nails which, if it were possible to preserve them uncut, would reach the length of 7 feet 9 inches.

No Joke.
Appearances are deceitful. The plate on the outside of many a Big Gun's private office says: "Push." But if you want to know why the Big Gun occupies his position, you will have to look at the plate on the inside of the door. It says: "Pull."

Greeks Made Use of Tin.
The Greeks in the Homeric times were familiar with the metal tin. Copper, tin and gold were used by Hephaestus in welding the famous shield of Achilles. Twenty layers of tin were in the cuirass of Agamemnon. No allusion to tin is found in the "Odyssey."

The New Age.
Fond Papa—"Well, son, what did you learn in school today?" Son—"Aw, not much, dad. We had a couple of two reels in history, a three reel travelogue in geography, and a split reel nature study. They used to give us a wild West pitcher once in a while, but they don't do it no more."—Widow.

Welcome Sounds.
There was not a sound in the house except the ticking of the clock. Mary was sitting on the floor, disconsolately playing with her doll. Suddenly there was a vigorous stamping of small feet on the porch. "Oh," exclaimed Mary, with a sigh of relief, "it makes me so delightful to hear Bob's foot-tracks."

Thrift Thought.
Get the thrift habit—the broad thrift habit, now; practice it thoughtfully; waste not the little things; find the joy that a growing bank account brings; invest your savings safely and profitably; remember tomorrow but forget not today; spend for the things that last and find the secret of the broader thrift that makes for better living. It is the only thrift worth while.

Playing Him.
June—"I will let you know my answer tomorrow night, Freddie. If I am wearing violets it will mean 'Yes,' and don't order over a dollar's worth sent to me tomorrow afternoon. It is time that you were beginning to economize."

Sports Clothes for Southern Climes

In the name of Palm Beach new and wonderful sports clothes are just being launched upon the sea of fashionable favor. They are more certain of smooth sailing than any other venture in new apparel, for they have a definite character that has already been enthusiastically approved. They admit of spirit—not to say daring—designs, and give opportunity for distinctive dressing, which every woman, young or otherwise, may take advantage of.

One of the new skirts, with an appropriate blouse and hat, all made for the southern sojourner, are shown in the picture. The indispensable shore bag, matching the skirt, is given prominence befitting the high esteem accorded everything in the way of bags.

The skirt is fitted about the hips by overlapping the stripes in plaits that are stitched down to the thigh. It is bordered and belted with the figured stripe in the goods and is otherwise plain. It fits the figure exquisitely.

The tailored blouse is of crepe de chine, with a satin panel down the front and on the cuffs, where white mother-of-pearl buttons are mounted.

The shore bag and the shore pillow have cast their lot together in a union that appears for the first time this

season, so that bag and pillow in one may be made to match the skirt. But oftener this clever combination of the two matches a hat and scarf made of silk.

The inspiration of the Chinese hat lingers in the pretty turban with straw brim and figured silk crown, shown in the picture. It is trimmed with a row of straw cabochons set about the brim edge.

Japanese Embroidery.

The Japanese are sending us some beautiful hand-embroidered materials which are being made up into lingerie. Perhaps the most striking examples are the white silk pajama sets for women. The jackets are beautifully embroidered in grapes and leaves, cherry blossoms and chrysanthemum blossoms. In the faintest of colors, and delicate pink lotus blossoms. The prices for the garments are graded by the amount of handwork upon them. They may be had in delicate colors, as well as in plain white. There is also the short kimono, embroidered in the usual designs on white, pink and blue grounds.

OUR COUNTY ROADS

Saturday, March 24th, the town of Crandon voted to bond to the amount of \$15,000.00 to complete the state highway system that lies within her boundaries. This amount of money will give the town of Crandon the direct benefit of connecting the important highways of the county that lead through the town and into the city of Crandon.

The Crandon-Monico road connecting with Oneida county and making a short route to Rhinelander and the cities west of there, reaching Minneapolis and St. Paul, will be one big value as it opens up a settlement at the Wolf River that will be developed very rapidly by this road. Also making an afternoon call on our neighboring city a pleasure.

The Crandon-North Crandon road when completed will give us an unbroken state highway through to Oneida county line by way of Hiles and connecting us to the highways leading to the lake region of River.

April 3rd the county votes on issuing an amount to equal the bonds of the several towns and apportionment to be made on the basis of the town bonds, thus each town will be assured of receiving the full amount from the county. This amount \$120,000.00 is sufficient to complete the trunk lines in Forest county touching every town in the county with important through routes. Surfacing will be carried on and roads constantly maintained. The great objects in building now is to develop the resources of the county that will lay idle and useless unless roads are built. There are thousands of acres of fine land that will be open for the settler that now can not be reached, and every mile of road that is upon our system is through territory that is productive.

Forest county feels that from the point of commercial value to her settlers the roads will be second to none and that the system of roads as adopted will give the county development that will make her one of the best in the state, as the resources are within its boundaries, land that is rich, lakes that are beautiful and streams that are full of pleasure for the fishermen and last but not least, communities that are awake and glad to welcome the newcomer, be he a settler or visitor.—Forest Republican.

Mrs. Jacob Starenski spent Saturday at Antigo.

Max McGinnis of Pelican Lake was a business caller Friday.

Ed. Wolfgram, the Lenox hotel and store man, is contemplating putting up a fine new building of concrete this spring at that place.

It will be 50x90 feet, and located about where his old building now stands. The territory adjoining that town is fine farm lands and is being rapidly settled. Mr. Wolfgram is making no mistake by building as Lenox is bound to grow.

Mr. and Mrs. Buschcavage of Pelican Lake were town shoppers Sunday.

Joe Nemchek of Crandon is in town.

Mrs. Rasmussen of Pelican Lake is in town.

Ed. Wolfgram went to Crandon Monday.

Leo Svic was to Crandon Monday.

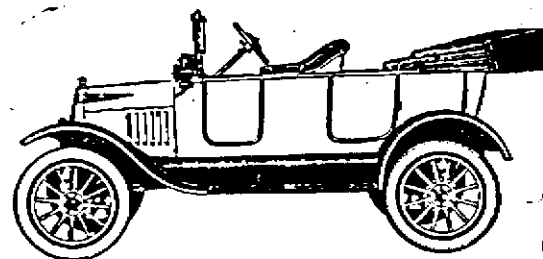

Not of Courses but Dishes.

Three courses seem to have been the customary menu in medieval times for a state banquet, less ceremonial feasts comprising only two, and no private dinner more than one. But each course might comprise from eight to a dozen different dishes. Thus at the wedding banquet of Henry V there were only three courses, yet over 30 different dishes are mentioned in the records, irrespective of fruits and wines.—London Chronicle.

So Should We.

We should hesitate to trade horses with a man who makes his living that way.—Atchison Globe.

PUBLIC LIBRARY FOR PHILLIPS

The city of Phillips is now assured a public library for the near future. At a meeting held in the high school assembly room, Monday evening, an organization was effected and a constitution adopted.

After deciding to have a library to be known as the Phillips Library association, and adopting a constitution, a ballot was taken for the election of a board of directors.

The officers will take up the duties of getting the necessary books, etc., and it is expected that the public library will be in running order some time in April.

Any resident of the city or contiguous territory may become a member of the association and it is hoped that everyone will avail themselves of the opportunity. Up to the time of holding the general

organization meeting, more than eighty persons signed as members, thereby declaring their intention to further this important and beneficial addition to this city.

Unhappy in Friendship.

Many people expect too much from their friends. They may themselves be so thoroughly genuine and sincere that they expect all their friends to be the same, and when they discover little faults in their friends they feel the disappointment most acutely. Do not pitch your standard too high, then you are less likely to have your idol shattered. Try to remember that friends will never disappoint us if we observe two simple rules: (1) to find out what they are; (2) to expect them to be just that.

The Overland Big Four continues
the famous 35 horsepower Over-
land which made this institution
the second largest automobile
concern in the world—in eight
years.

It is the same comfortable, roomy,
powerful, rugged car that for
years has outsold all cars which
now sell for more than \$100.

Its brand new body design makes
it more attractive than ever.

The wheelbase is 112 inches and it
has long 48 inch cantilever rear
springs.

We believe it is the most com-
fortable, the easiest riding car
to be had for the price—\$850.

It is as clearly as ever the excess
value car of its class.

And the Overland Light Six is
likewise the excess value car of
its kind.

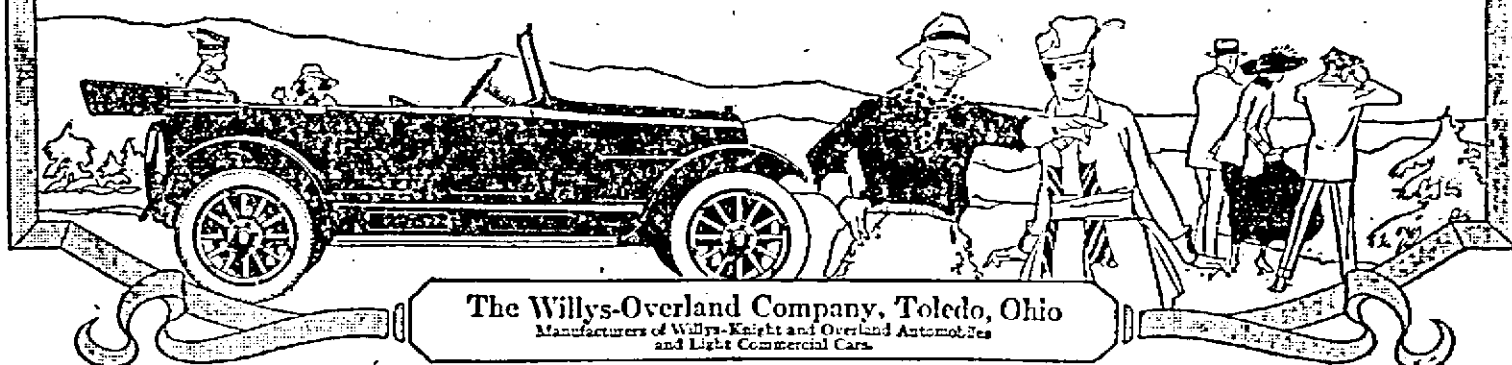

Most of the body and chassis parts
of the Light Six are the same as
those of the Big Four.

So the Six shares directly in the
economics of the combined pro-
duction of fours and sixes.

These cars exemplify with great
clearness the excess values made
possible through the economics
effected by our huge production
of the most comprehensive line
of cars ever built by any one
producer.

Ask us to show you the Big Four
and the Light Six.

SCANDINAVIAN NEWS

SUMMARY OF IMPORTANT HAPPENINGS IN FAR OFF NORTHLAND.

ITEMS FROM THE OLD HOME

Resume of the Most Important Events in Sweden, Norway and Denmark—Of Interest to the Scandinavians in America.

DENMARK.

A man knocked at the door of the jailkeeper in Maribo one evening and asked to be put in jail. The jailkeeper told the man that he could not accommodate him. In a little while the man returned, and a second time he was refused admittance. Then he went to a man on the street and explained his bad luck. "Sing a song," said the stranger, "and you will be put in jail." The would-be jailbird went up the street singing "Augusta" as best he could. Now a night watchman came and took charge of the man. Did he put him in jail? Not at all, he simply conducted him to his home.

Old Ellen Nilas of Bistrup, has passed away at the age of eighty-two years. During the latter part of her life she was known as "Ellen the Wise," for she had the reputation of knowing how to get rid of many of the ills to which human flesh is heir. Partly by reading, partly by oral information, and partly by practical experience she became able to cure many diseases, and the people gradually came to look upon her with a certain superstitious reverence. The Swedish laws are hard on quacks, and the fact that she did not get into trouble with the authorities proves that she earned the title of "Ellen the Wise." Long before her death she was known far and wide.

An organization of Danish ship owners has been formed with the object of keeping Danish shipping on the seas in spite of the submarine war. A Reuter dispatch from Copenhagen reports. The new company is pledged to keep its ships in service under the conditions laid down in international law, whatever action Germany takes. The ships will be used exclusively for the carriage of foodstuffs and other necessities between Denmark and ports of the United States and Great Britain. The company will have available capital to purchase new tonnage on a large scale.

American hardware manufacturers will find the Scandinavian countries a promising field for pushing their trade after the war, according to a report issued by the department of commerce in Washington. Denmark, Norway and Sweden will have to restock with hardware, the report declares.

FINLAND.

Elucidating the manifesto extending new liberty to Finland, the foreign office of Russia explains that the aim of the new government is to abolish completely all the restrictions which stripped the grand duchy of the historical rights conferred upon it in 1812. In that year Finland became part of the Russian empire. All laws, illegally imposed upon Finland during the reigns of Alexander III and Nicholas II are declared void. Russian members of the Finnish senate who, contrary to the constitutional rights of the country had been appointed by the imperial government instead of being elected by the Finnish landtag, have been removed and will be replaced by Finns chosen according to law. Full self-government, including the right to initiate legislation, determine the revenues and expenditures of the country and assess taxation will rest exclusively in the control of the Finnish legislative bodies.

NORWAY.

Indications of renewed tension between Norway and Germany are appearing in the German newspapers. The Cologne Gazette makes a feature of an editorial headed "Norwegian Intolerance" in which it says: "The press of Norway in these days has assumed a tone of an insulting character which Germany cannot tolerate. The Norwegians would do well to remember that their unbridled press campaign once before led to diplomatic tension. A sense of responsibility should have kept the papers from again slinging the same tuz." . . .

It is probable that the neutrality markings on Norwegian vessels soon will be removed. It is pointed out that these markings, which have been painted on the sides of the ships during the war, not only do not any longer protect neutral ships, but make them an easy prey for submarines.

In proportion to its population, Norway is the greatest seafaring nation in the world. On January 1, 1918, its mercantile marine consisted of 3,458 vessels, with a tonnage of 2,734,397, or an average of more than one ton for each inhabitant, and practically the whole fleet is owned by Norwegian citizens.

The city council of Fredrikshald voted unanimously to distribute \$2,700 among the poor people of the city in order that they might be able to buy fuel for keeping their houses warm.

The first great problem confronting the new congress of the United States is the organization of the house. There is said to be a difference of one vote between the two great parties, and it is supposed that in case of a party vote half a dozen more or less independent members may turn the balance. Many patriots suggest that the party lines be ignored in the interest of the common weal of the nation as a whole. In this connection it is interesting that an attempt at coalition has just been made in Norway. The conservative members of the storting made a formal proposition to the Liberals, who are in power, to drop some of the Liberal members of the cabinet and put Conservatives in their places. The arguments used by the Conservatives were that an omni-partisan cabinet would be more efficient, and that it would enjoy greater confidence among the people at large. The Liberals held a caucus and formulated an answer to the effect that it would be safest for the country to let the present cabinet remain undisturbed.

As late as the 20th of February the lakes and canals of Telemarken were navigated by steamers. But the captains reported that in some places the ice was almost a foot thick in the channels through the sheet of ice, and that these channels themselves were getting dangerously narrow. One steamer knocked off the blades of its propeller in the ice so that it had to be towed out of the channel by another steamer.

Considerable quantities of fine fruit is raised in the deep valleys of western Norway. But it is poorly prepared for the market, so that fruit growing is not very profitable. Now the fruit growers are urged to pick and pack up their products in better shape, and they may be sure of handsome returns.

SWEDEN.

The Russian revolution has brought relief to Sweden, which sincerely hopes that the new regime in Petrograd will be permanent. The Swedish nation never felt safe, as long as an autocratic government ruled in Russia. The new Russia will not constitute any danger for her neighbors, especially Sweden. Democracy has always been opposed to aggressive wars. The new Russian government will also be too busy within her own frontiers, after the present war, to bring to an end, to even think of disturbing the peace of its neighbors. It is expected that the Russian revolution will result in a further decrease of Sweden's sympathies for Germany and an approach of the former toward the allies. It was Sweden which took the initiative in the co-operation between the three Scandinavian countries in regard to foreign problems created by the war. Norway and Denmark have from the beginning leaned toward the allies, but the influence of Sweden, the only one of the Scandinavian kingdoms possessing an up-to-date army of considerable size, has until now prevented any open demonstrations in favor of the allies. The reasons for such a restraining influence on the part of Sweden has now disappeared. The new Russia will have many friends in Sweden. The liberal elements in that country have always been interested in Russia's fight for liberation from the yoke of bureaucracy. Members of the Russian duma have repeatedly visited Stockholm, where they have been accorded cordial reception. The Swedish business men will be quick to see tremendous opportunities for Swedish commerce and industries in Russia, governed by an efficient administration, supported by public opinion. The geographical position of Sweden will give her a decided advantage on the Russian market over other countries. The stimulation of the commercial intercourse between Sweden and Russia will, no doubt, do more than anything else to remove the animosity among the Swedes toward Russia.

In Washington it is said that Sweden is interested in offering mediation between the United States and Germany if acceptable to former. There have been informal conferences between the Swedish minister in Washington and the ambassadors of the A. B. C. powers of South America. The aim is said to be to induce the three Latin countries to propose mediation. It is reported, but denied by Secretary Lansing, that Ira Nelson Morris of Chicago, American minister to Sweden, has called the state department inquiring whether mediation by the Stockholm government would be acceptable. The prominence of Sweden in the reported mediation undertaking, has led to the surmise that Germany is seeking to avoid war with the United States and contemplates a back-down by the mediation route.

There were 210,000 telephone apparatuses in use in Sweden at the beginning of the year.

Only sixteen automobiles were in use in Gothenburg last winter.

The Swedish sick aid funds have paid out \$27,000,000 as sick aid during the past 25 years. During that period the number of local organizations increased from 200 to 2,000, and their total membership from 24,735 to 730,000. The annual receipts and expenditures now balance at about \$27,000,000.

It is claimed that Swedish captives in Germany are underfed, and the aid committee of the Red Cross of Sweden has taken steps to send food to these unfortunate men.

ENTERPRISE

Mrs. A. Stromberg and baby are guests of relatives in Antigo.
Mr. and Mrs. Geo. Johnson spent a week with the former's parents here.
W. Webster was in Rhinelander on business last week.
Mr. and Mrs. A. Brackett of Parish Jct., visited relatives here.
Mr. and Mrs. Thos. Davis spent

a few days with relatives and friends in Crandon.
F. A. Buelow made a business trip to Clintonville last week.
Wm. Haase was a Rhinelander business caller Friday.

M. Leith spent a few days with his family in Antigo.

Mr. and Mrs. A. K. Kushman and daughter were Rhinelander callers Thursday.

Mrs. Ed. White was called to Bundy by the serious illness of her sister.

R. Schoeneck was in Elcho Friday on business.

Mrs. F. A. Buelow is visiting relatives in Antigo this week.
Mrs. H. Beyer, who spent several months at the home of her daughter, Mrs. A. Kushman, went to Antigo where she will visit at the M. Leith home. From there she will return to her home in Big Rapids, Mich.

I. Brackett, S. Fort and A. Soik of Parish Jct., were in town Tuesday.

Miss Martha Johnson of Parrish spent the week end with her parents here.

Substitute for Tobacco.
Throughout the tropical Orient the natives employ a substitute for tobacco consisting of a slice of aricapalm nut, wrapped in betel leaf, flavored with a fine lime made of native sea shells, and colored with carmine. The habit is universal, especially with the women, and sellers of "betel nut" may be seen on many of the street corners in Saigon and other cities of Indo-China.

Remarkable Linguist.
The greatest of all linguistic geniuses was undoubtedly Giuseppe Mezzofanti, who died in 1843. Not only could the wonderful Italian read 50 or 60 different languages, besides many dialects, but he could also speak and write them with astonishing fluency. It was contended that Mezzofanti could converse with natives of practically every quarter of the globe.

Error Hard to Eradicate.
Error, we are poetically assured, when wounded, writhes in pain and undergoes an almost immediate demise, but in sober truth we know otherwise. Error is like a decapitated snapping turtle that continues to hang on for unaccountable lengths of time after it ought to recognize the nature of the situation and die.

Power of First Impressions.
In spite of the fact that she has often been corrected our fair young friend Chloroda still calls it the partial post—New Orleans State.

Life.
"Young man, there is nothing worse than high life on a low salary," said the wise man who is always giving advice. "Oh, I don't know," replied the young man who knew a thing or two himself, "it's no worse than low life on a high salary."—Florida Times-Union.
